

MoSSEC

A new initiative for sharing
Modelling and Simulation
information in a collaborative
Systems Engineering Context

Adrian Murton
*Expert in Modelling and Simulation
Collaboration Frameworks*
Airbus

GLOBAL PRODUCT DATA
INTEROPERABILITY
S U M M I T
2014

Agenda

Global Product Data Interoperability Summit | 2014

- **Why do I need MoSSEC?**
- **What is MoSSEC?**
- **How do I get involved in MoSSEC?**
- **Summary**

Adrian (Ad) Murton

Global Product Data Interoperability Summit | 2014

- **BSc Computing & Informatics**
- **BAE SYSTEMS (1986 – 2001)**
 - Corporate Research Centre
 - Led Concurrent Engineering research team
- **Airbus UK (2001 – present)**
 - Engineering – Knowledge Based Engineering
 - ICT – Product Line Manager
 - Engineering – Simulation Projects

Agenda

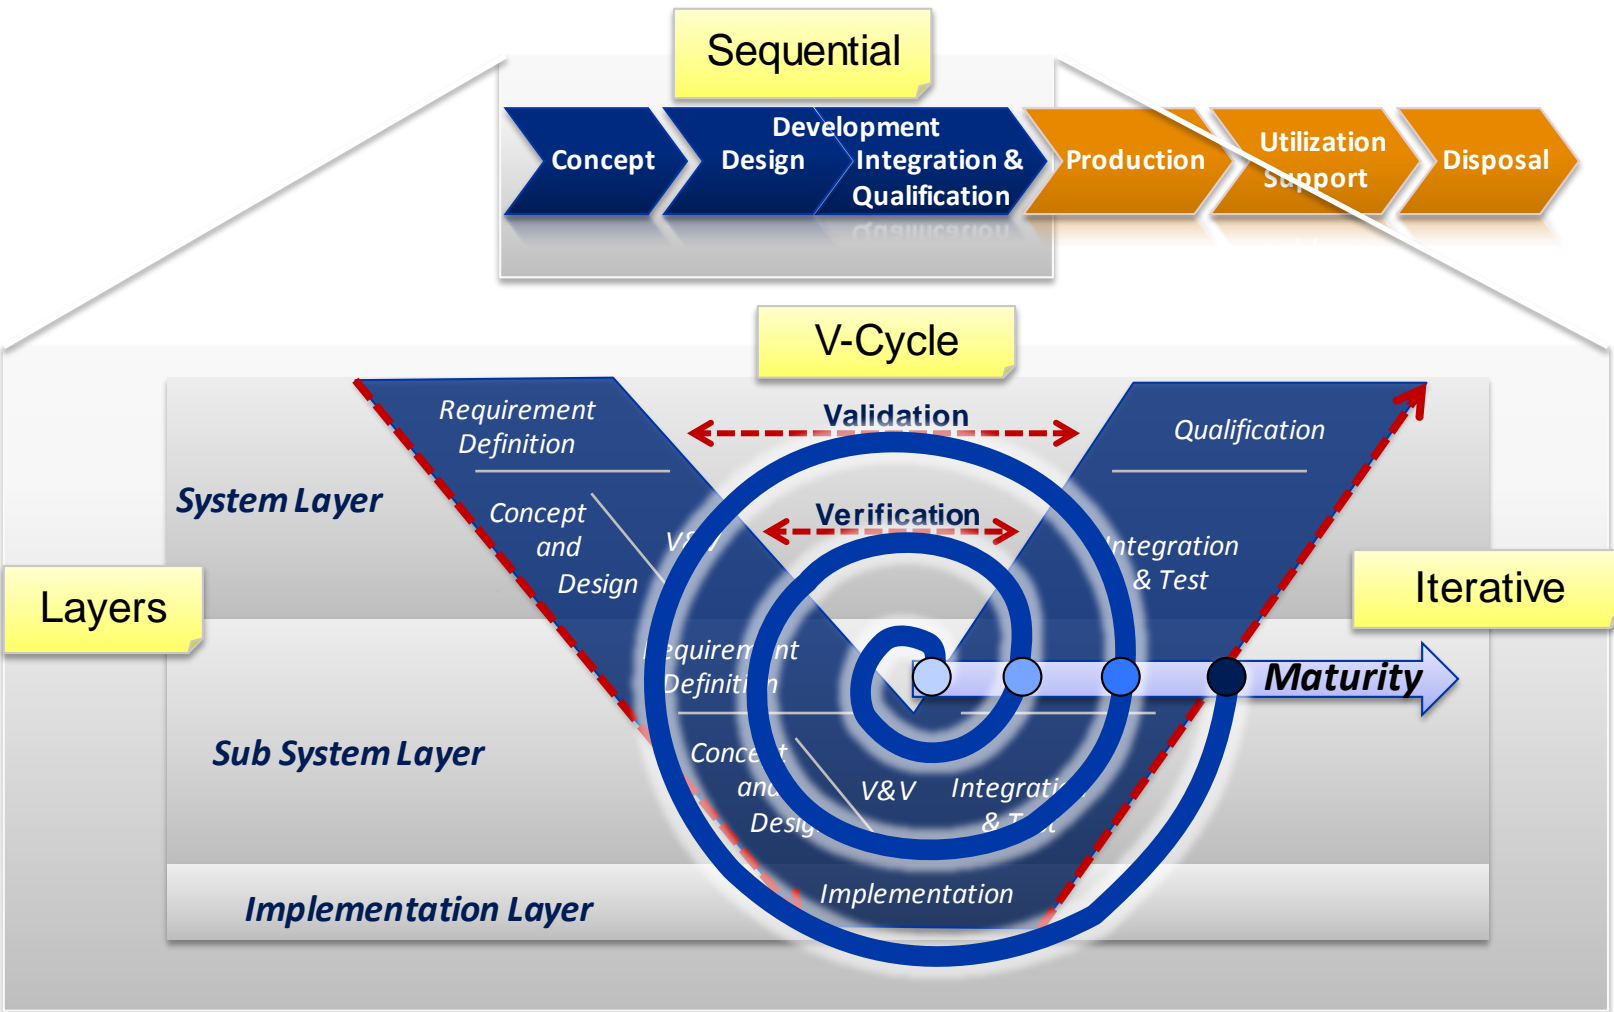

Global Product Data Interoperability Summit | 2014

Why do I need MoSSEC?

- What is MoSSEC?
- How do I get involved in MoSSEC?
- Summary

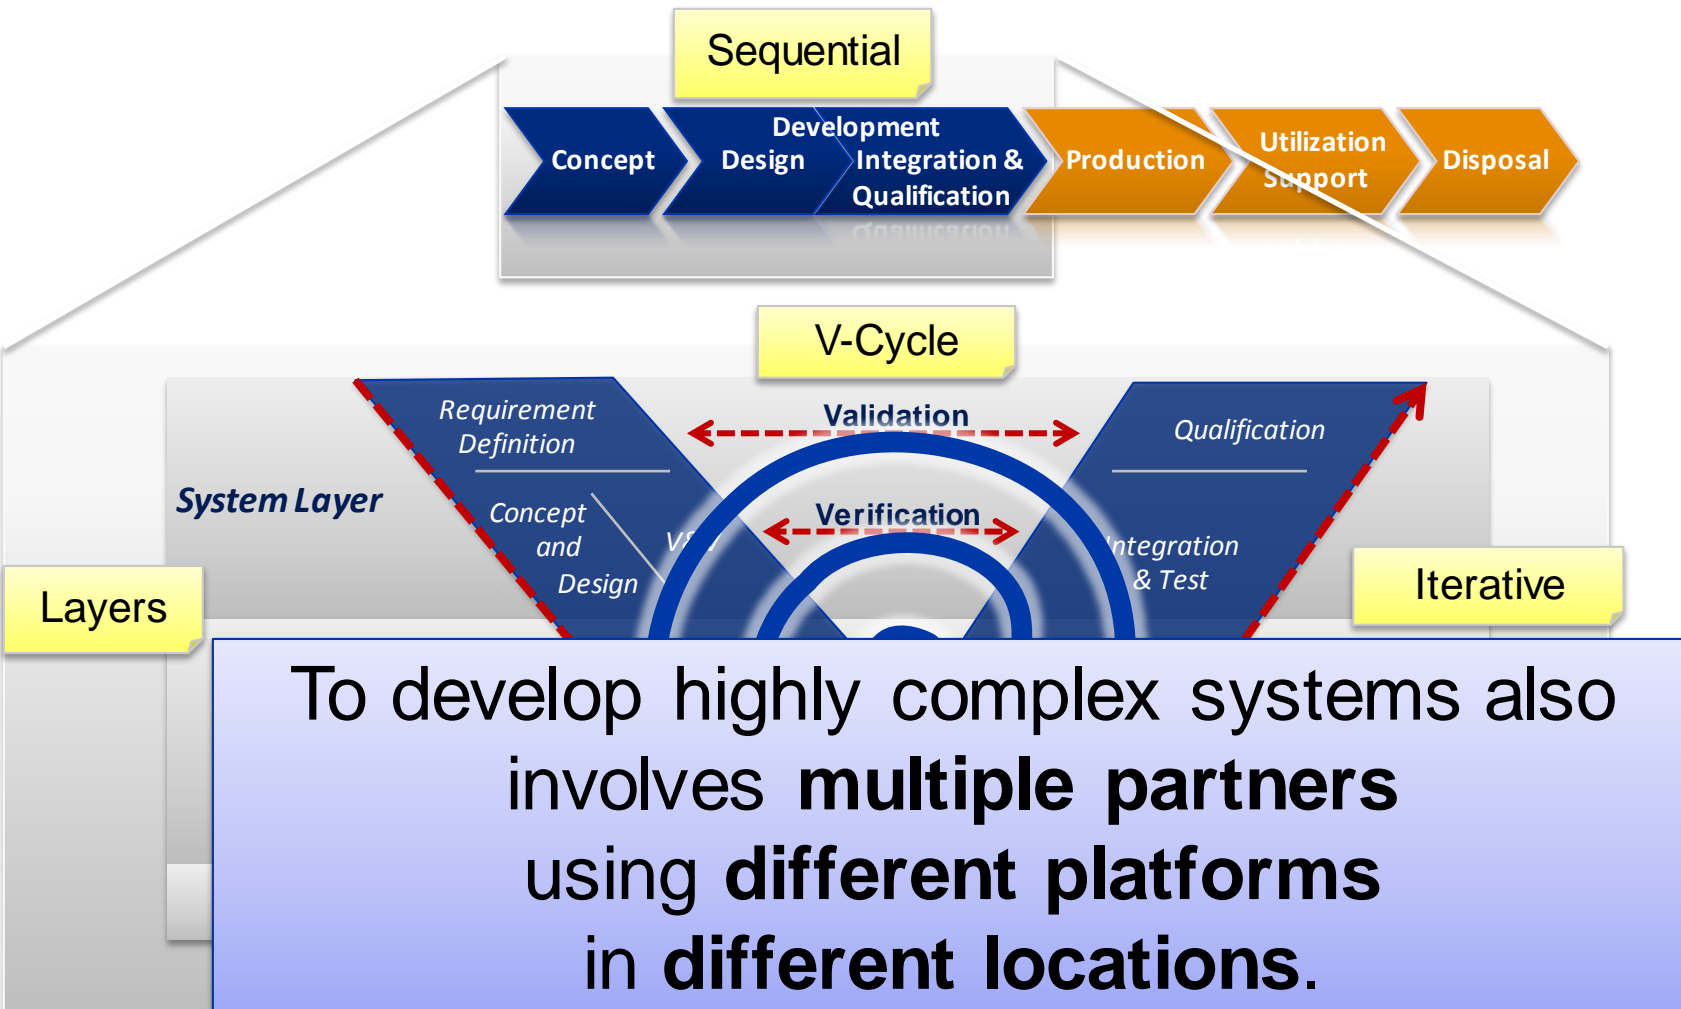

Lifecycle of “System of Interest”

Global Product Data Interoperability Summit | 2014

Lifecycle of “System of Interest”

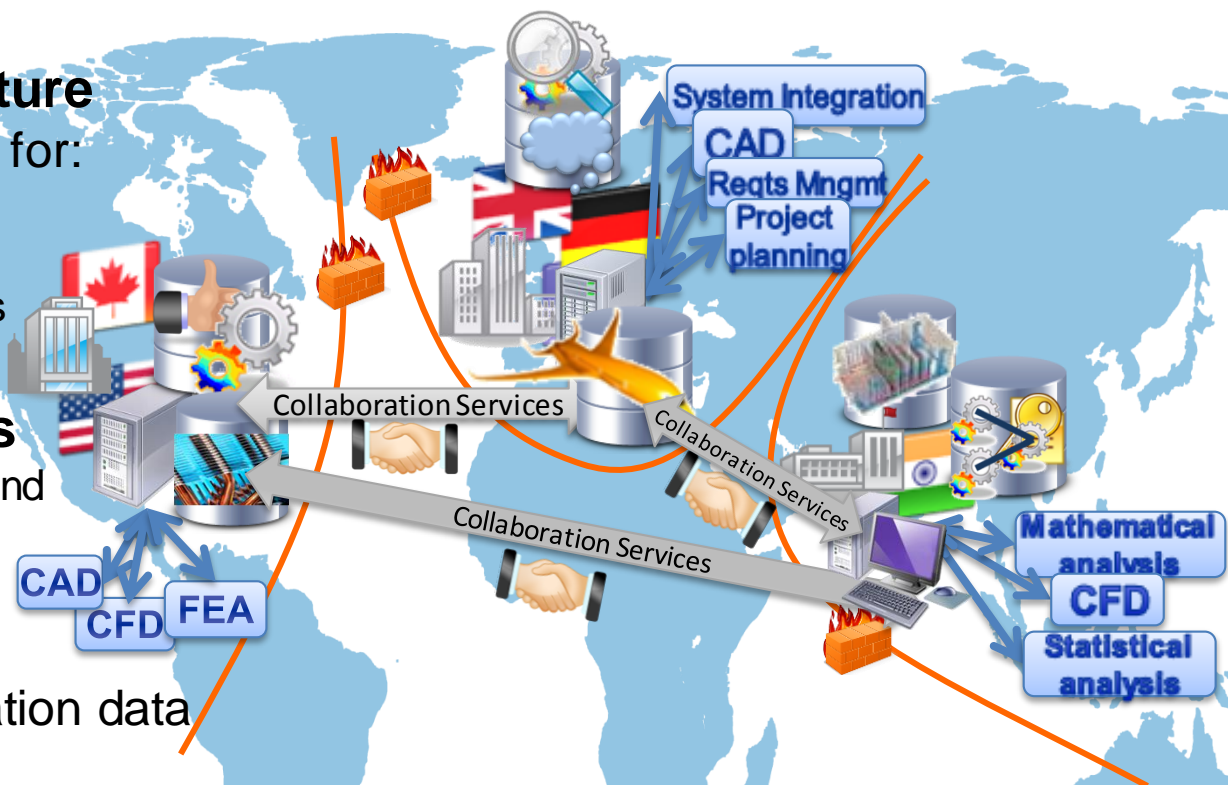

Global Product Data Interoperability Summit | 2014

Challenges for distributed systems engineering

Global Product Data Interoperability Summit | 2014

- **Distributed Infrastructure**
 - Secure Collaboration for:
 - Locations
 - Organisations
 - Software Platforms
- **Distributed Processes**
 - Multitude of Modelling and Simulation tools
- **Distributed Data**
 - Modelling and Simulation data
 - V-cycle meta-data
 - (who what when where how why etc)
 - Efficient sharing, synchronisation and integration

Remain Compliant with existing Standards (e.g. AP233, AP239, AP242)

Challenges for distributed systems engineering

Global Product Data Interoperability Summit | 2014

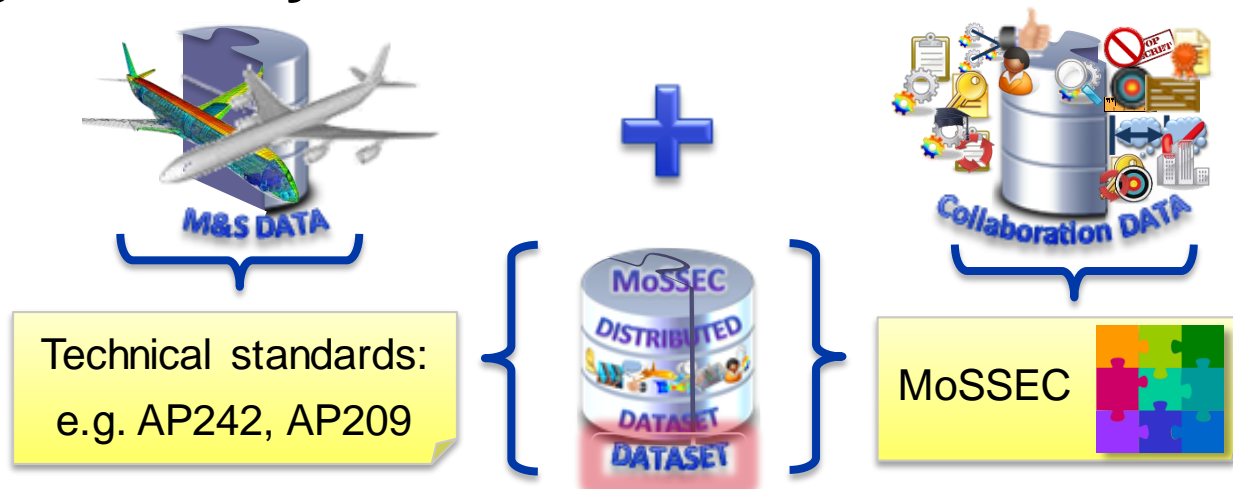

- **Distributed Infrastructure**
 - Secure Collaboration for:
 - Locations
 - Organisations
 - Software Platforms
- **Distributed Processes**
 - Multitude of Modelling and Simulation tools
- **Distributed Data**
 - Modelling and Simulation data
 - V-cycle meta-data
 - (who what when where how why etc)
 - Efficient sharing, synchronisation and integration

Collaboration vs Modelling & Simulation Data

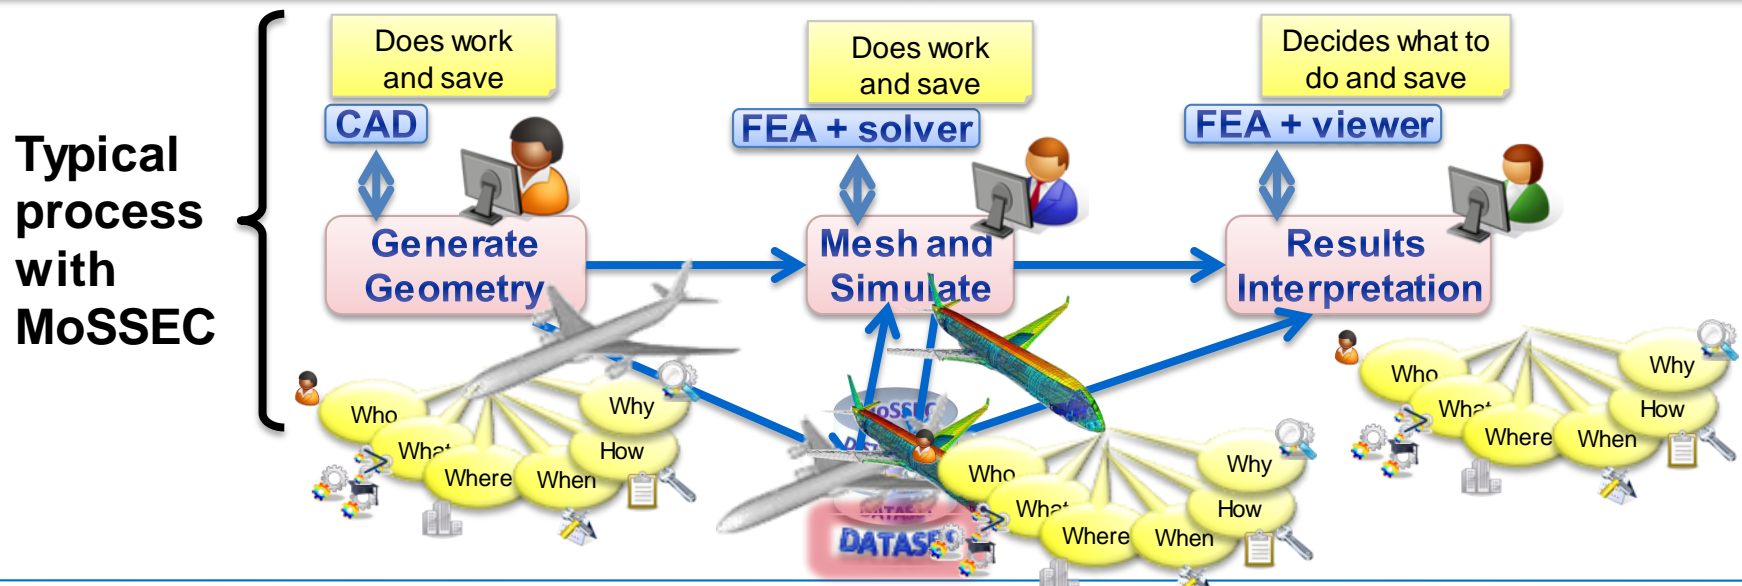

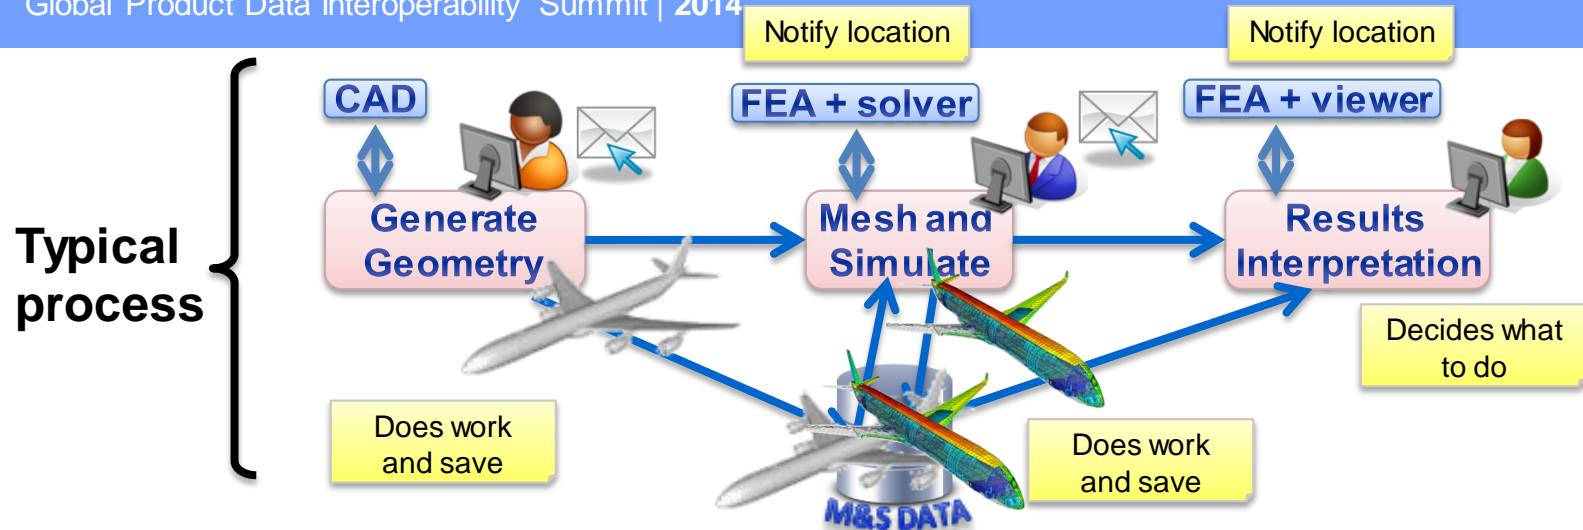

Global Product Data Interoperability Summit | 2014

- **Modelling and Simulation data**
 - Managed in the PLM/M&S systems
 - Exchanged with technical standards
- **Collaboration data**
 - Managed by MoSSEC Compliant Tools
 - Exchanged with MoSSEC services
- **Together they enable the distributed dataset**

How is it used in practise

Global Product Data Interoperability Summit | 2014

How is it used in practise - distributed

Global Product Data Interoperability Summit | 2014

- **Distributed Infrastructure**

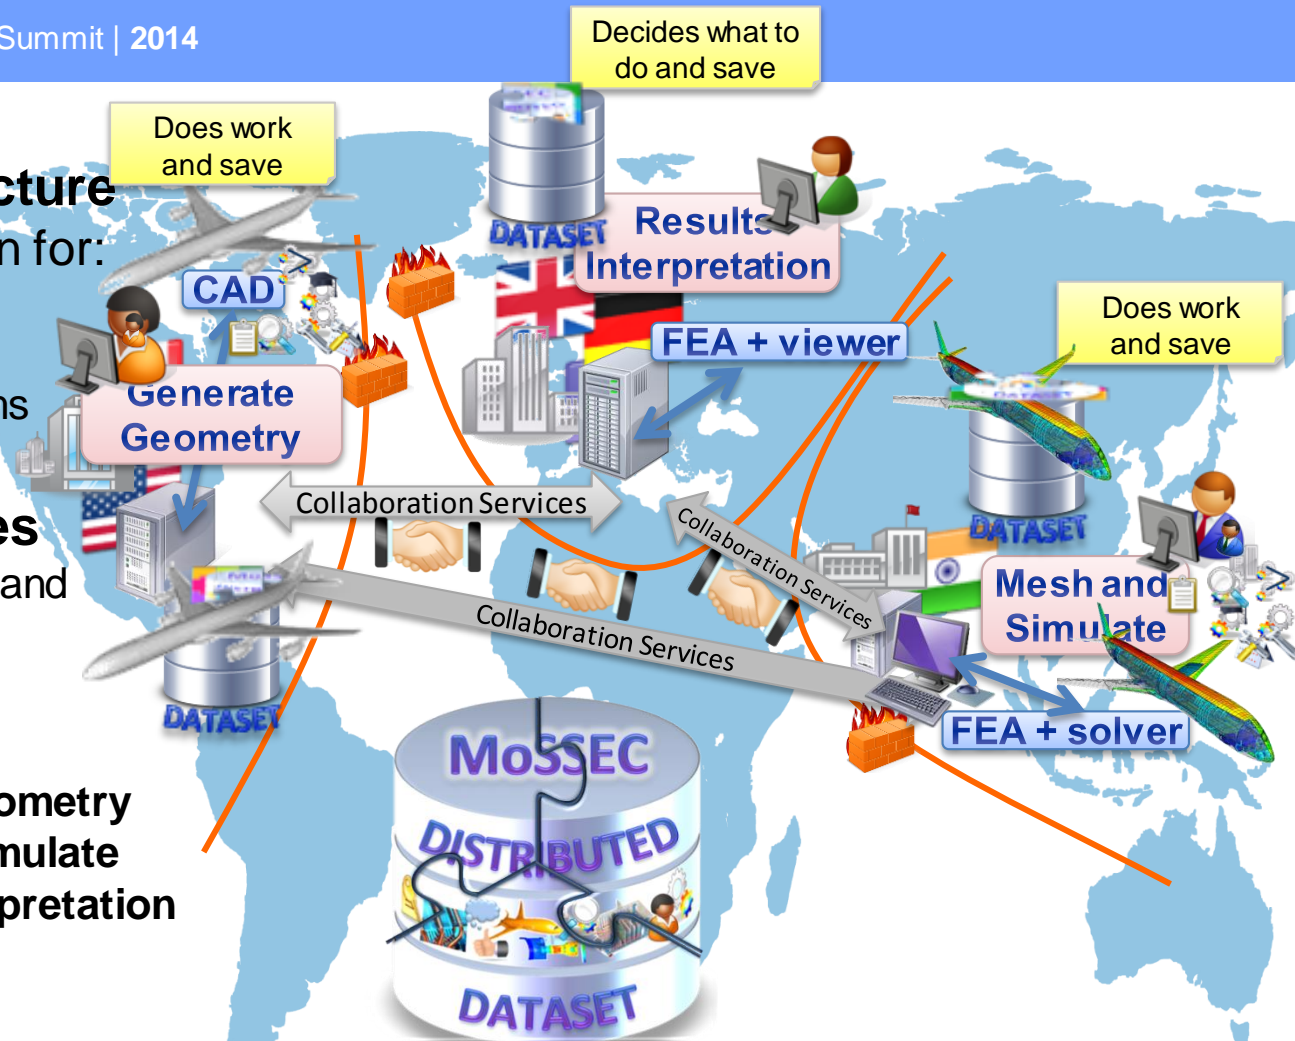

- Secure Collaboration for:
 - Locations
 - Organisations
 - Software Platforms

- **Distributed Processes**

- Multitude of Modelling and Simulation tools

- **Distributed Dataset**

- Step1 – Generate Geometry
- Step2 – Mesh and Simulate
- Step3 – Results Interpretation

The MoSSEC structure and services enable the distributed dataset

Agenda

Global Product Data Interoperability Summit | 2014

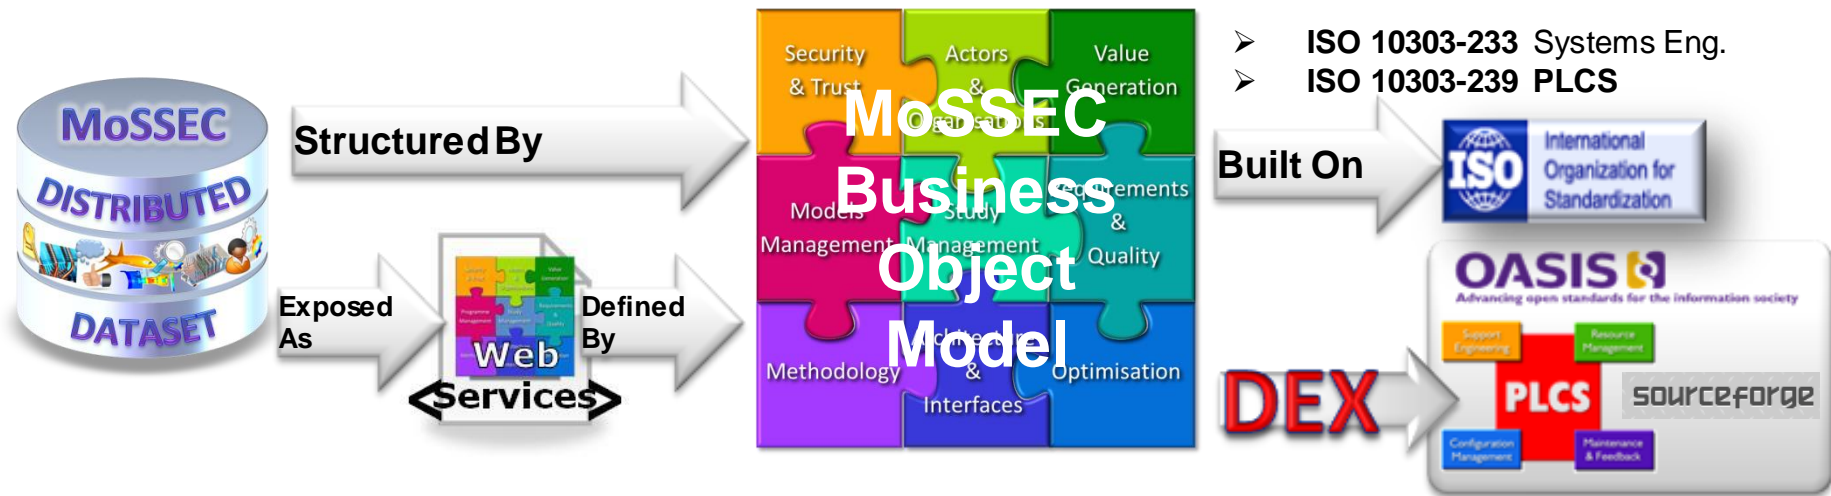

- **Why do I need MoSSEC?**

What is MoSSEC?

- **How do I get involved in MoSSEC?**
- **Summary**

MoSSEC: a common approach based on standards

Global Product Data Interoperability Summit | 2014

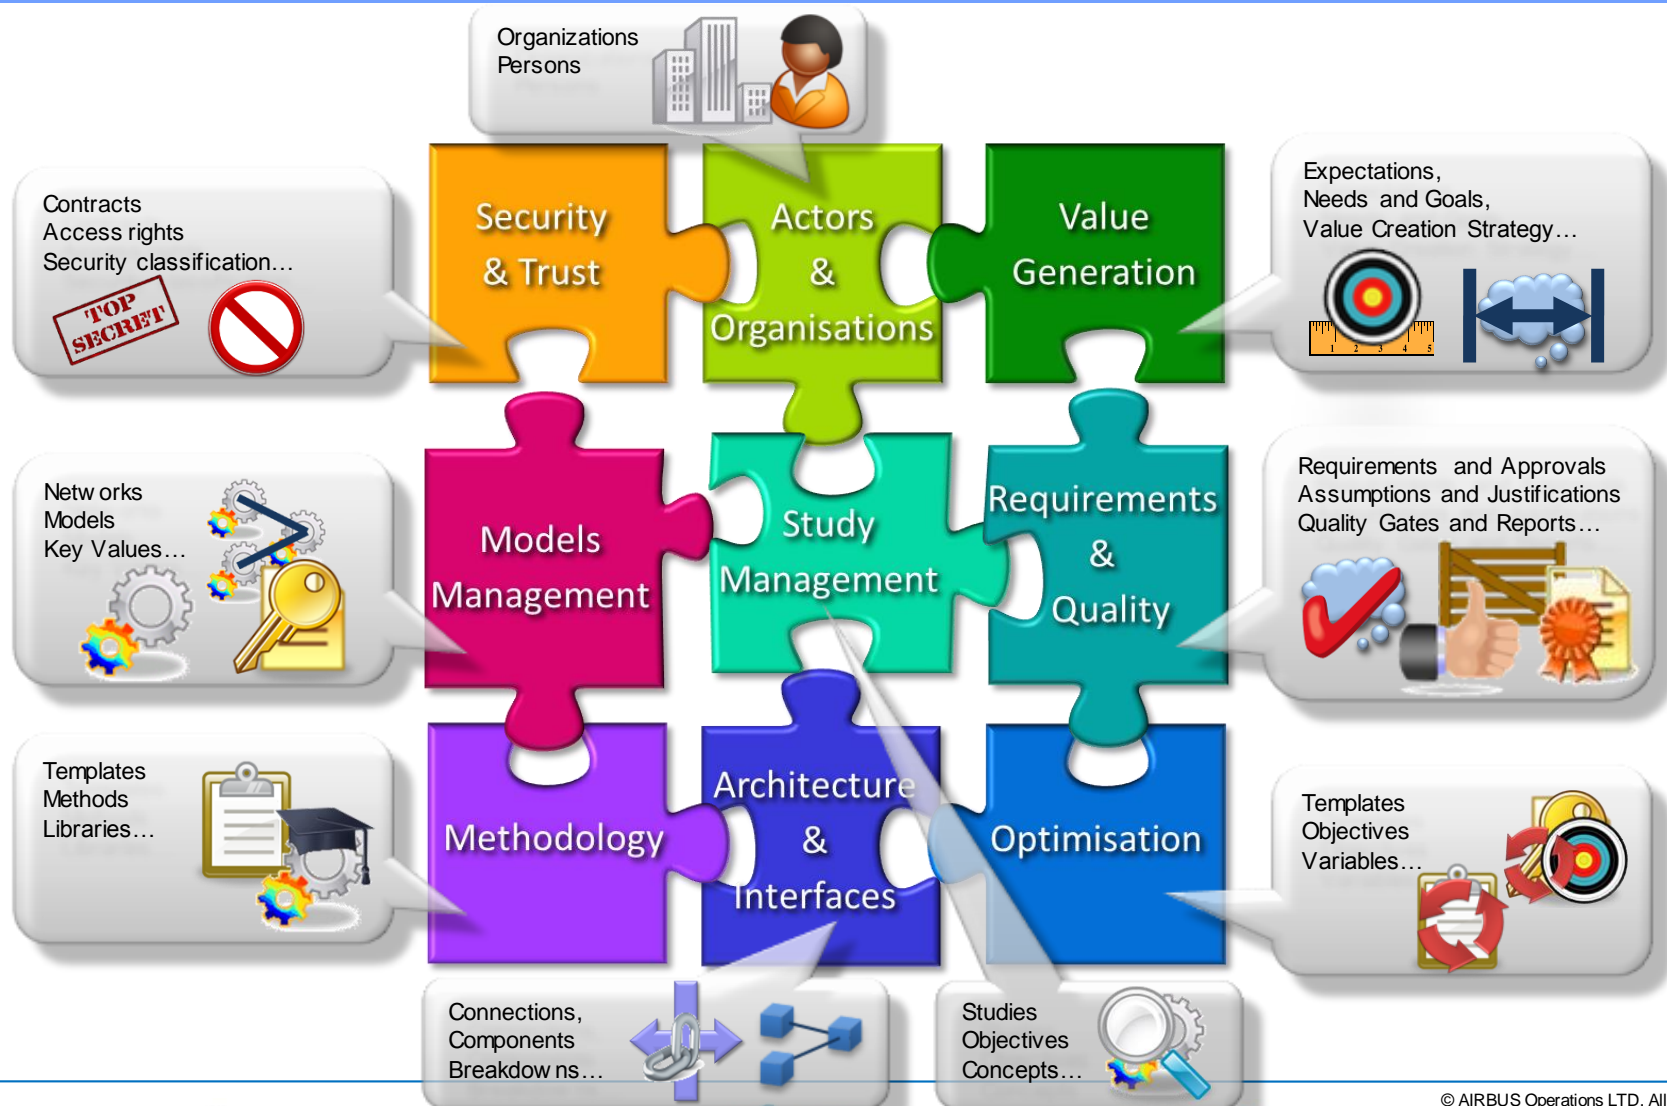

- MoSSEC provides a common approach for:
 - Structuring the Distributed Dataset
 - Structuring the Information Services for Dataset Management
- MoSSEC is built on ISO standards

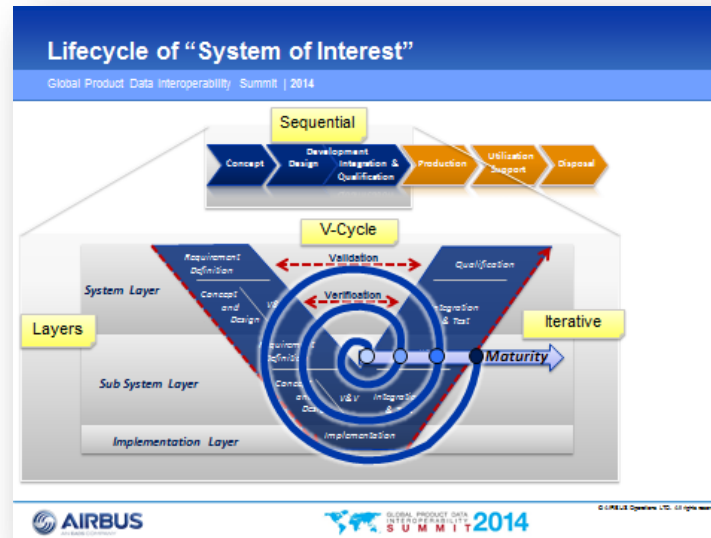

MoSSEC Business Object Model coverage

Global Product Data Interoperability Summit | 2014

MoSSEC Business Object Model coverage

Global Product Data Interoperability Summit | 2014

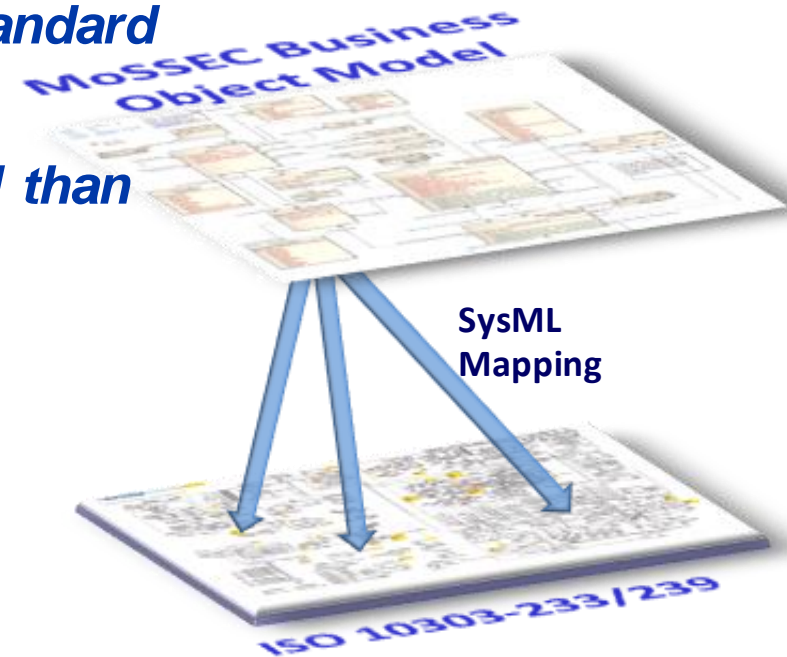

MoSSEC enables capture of data throughout the Lifecycle of the "System of interest"

Why not just use the ISO standards?

Global Product Data Interoperability Summit | 2014

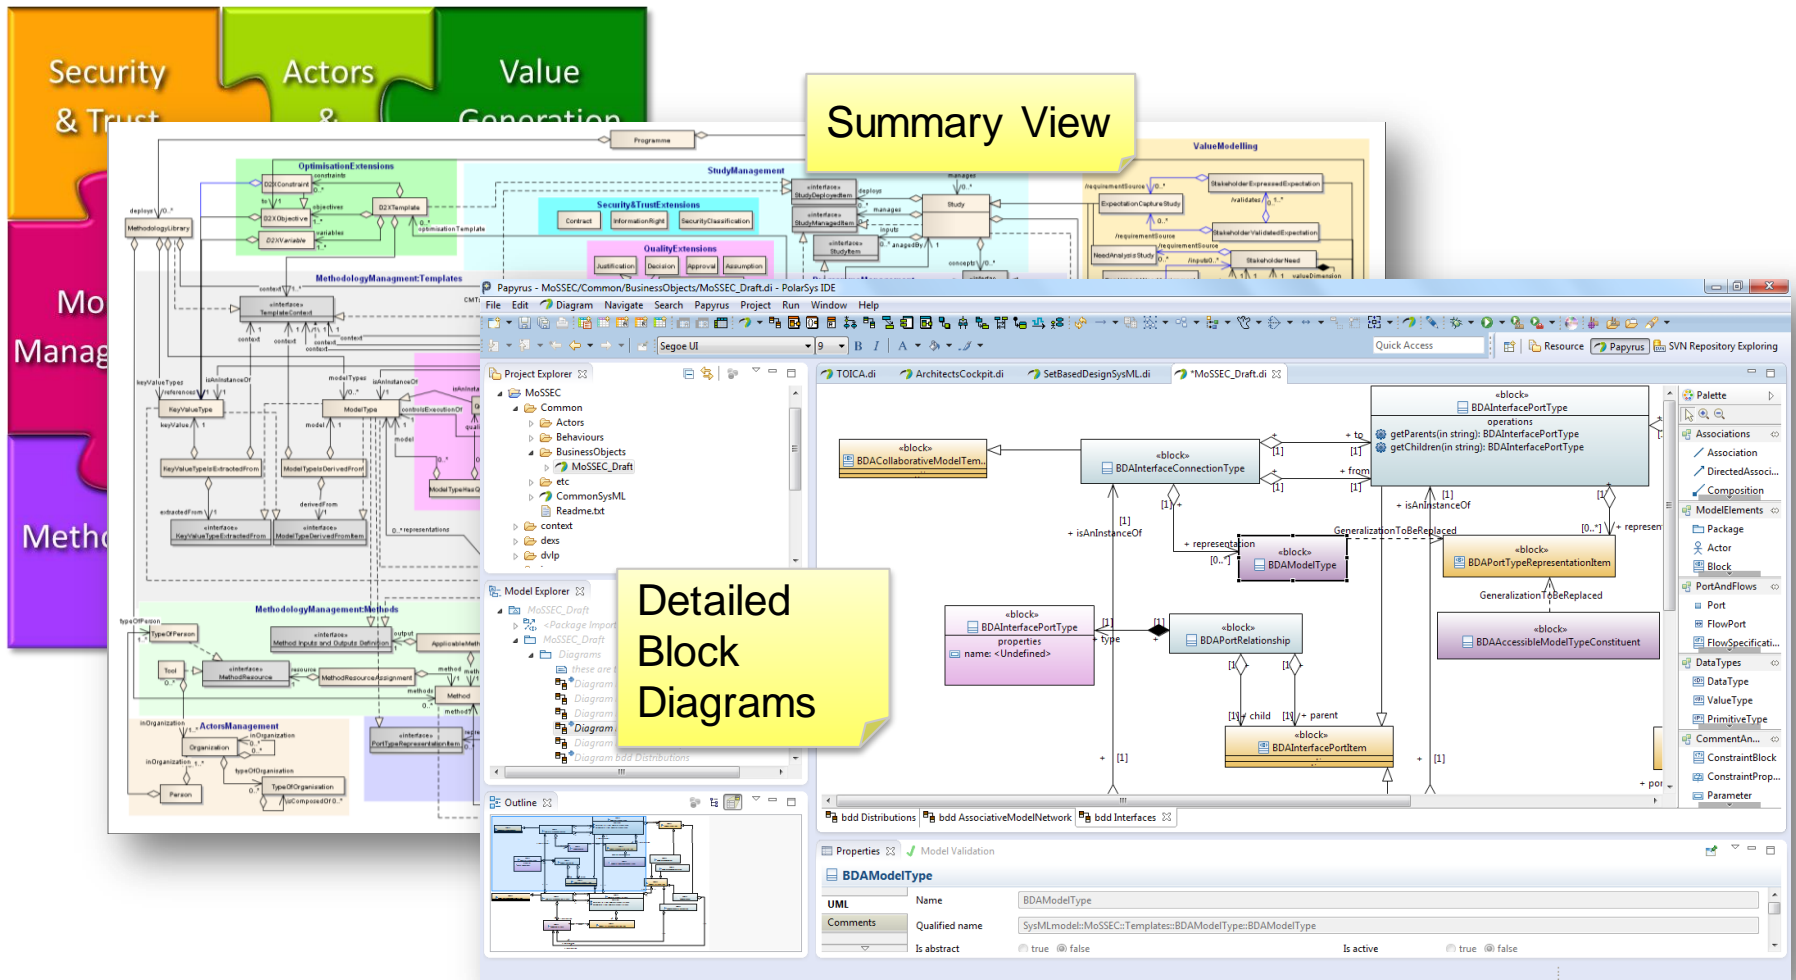

PLCS (ISO 10303-239) is **generic**, **flexible**, and designed to be **extended** and **specialised** therefore:

- *MoSSEC Business Object Model provides usage guidance to explain how the standard is used in context*
- *MoSSEC Services are at a higher level than the standard, so are more efficient*

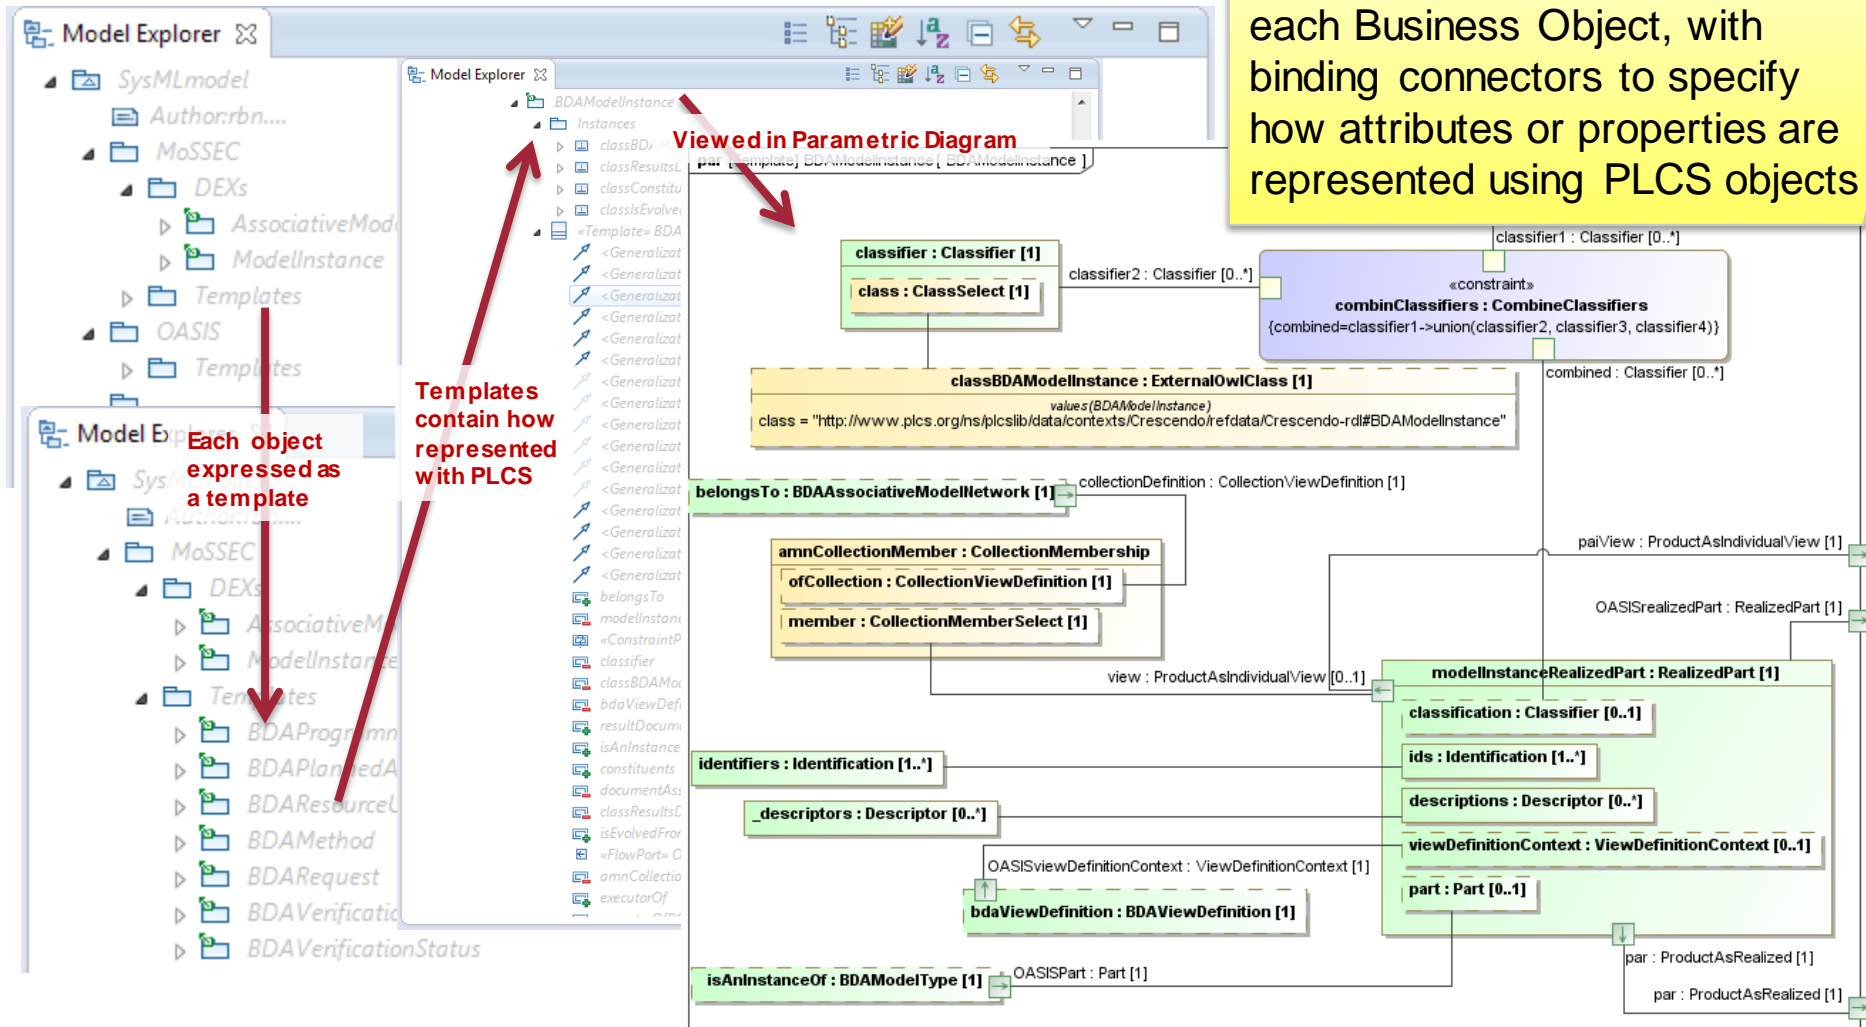

MoSSEC Business Object Model defined with SysML

Global Product Data Interoperability Summit | 2014

MoSSEC mapped to Standards with SysML in PLCSLib

Global Product Data Interoperability Summit | 2014

MoSSEC via Data Sharing

Global Product Data Interoperability Summit | 2014

MoSSEC Data
Exchange
[DEX]
specification

MoSSEC
Templates

- **Data Sharing (Web services)**

- Defined using WSDL + XSD
- Management of WSDL: To be Defined
 - (e.g. OASIS PLCS, OASIS OSLC, OMG, ISO TC184SC4)

MoSSEC Web
Services
specification

using e.g. file
transfer

Collaboration Exchange

Data shared
using Web
services

Collaboration Services

MoSSEC via Data Exchange

Global Product Data Interoperability Summit | 2014

MoSSEC Data
Exchange
[DEX]
specification

MoSSEC
Templates

- Data Exchange (file based)
 - Baseline: DEXs to use OASIS PLCS PSM templates
 - Recommended practices (formal mapping of information model to underlying OASIS PLCS Standard)
 - Target: DEXs to be based on ISO AP239 Ed 3 (assuming this happens – TBD)

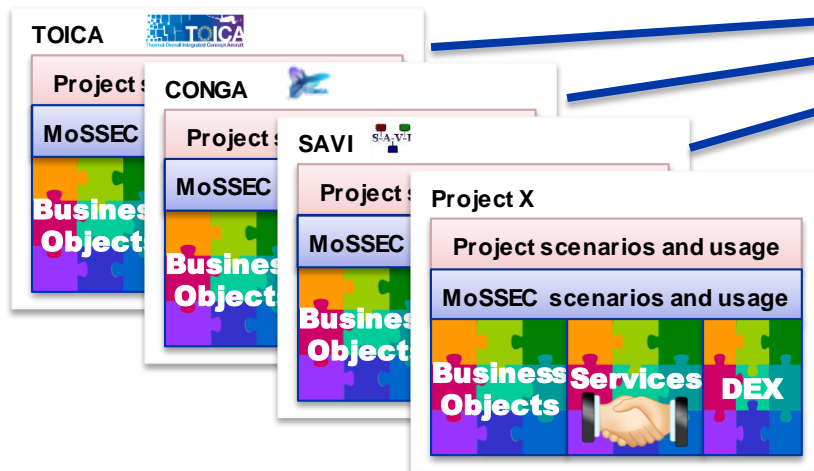

Data exchanged
using e.g. file
transfer

Collaboration Exchange

MoSSEC Evolution and Development

Global Product Data Interoperability Summit | 2014

- Using a MBSE approach
 - Captured using Polarsys
- Utilised by projects
- Contributions from Projects consolidated

More projects are welcome to join and contribute.

MoSSEC: Current and previous case studies

Global Product Data Interoperability Summit | 2014

- **CRESCENDO** *Collaborative and Robust Engineering using Simulation Capability Enabling Next Design Optimisation* – 59 partners

- Thermal Aircraft
- Power-plant integration
- Energy Aircraft

- **TOICA** *Thermal Overall Integrated Concept Aircraft* – 30 partners

- Dynamic Aircraft Thermal Architectures
- functional, physical, zonal, logical...

- **CONGA** *Configuration Optimisation of Next Generation Aircraft* – 7 partners

- Set Based Design

- **SAVI** *System Architecture Virtual Integration* – 11 partners

- Printed Circuit Boards

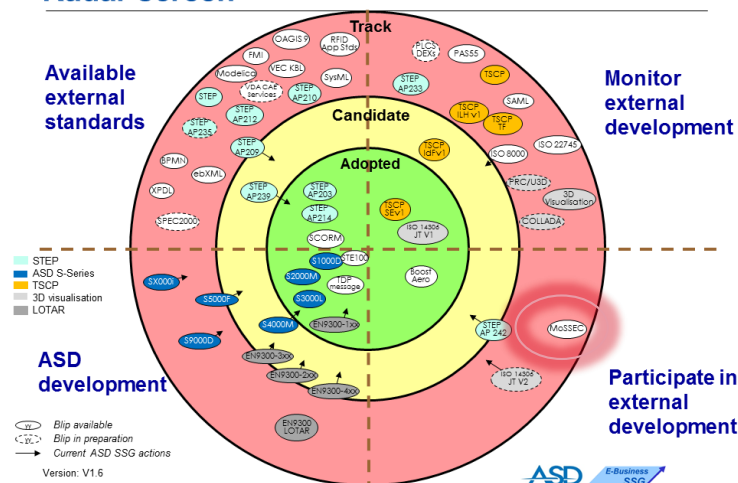

Vendor involvement

Global Product Data Interoperability Summit | 2014

- **Vendors are active in evolving and implementing the standard as part of ongoing research projects**
- **Vendors involved include:**
 - **Dassault Systèmes**
 - **Eurostep**
 - **MSC**
 - **Siemens**

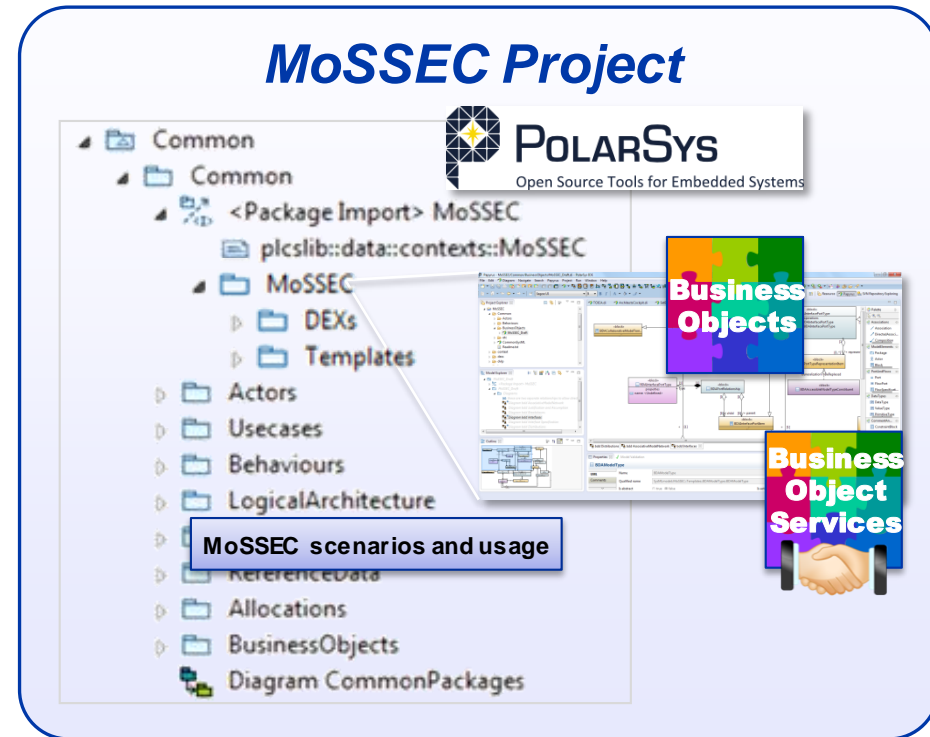

A MoSSEC distributed dataset will only happen if vendors implement clients and servers

What's next – Create International MoSSEC Project

Global Product Data Interoperability Summit | 2014

- Agree scope of MoSSEC releases
- Create the relevant modelling, documentation and usage guidelines
- Push through the relevant standards bodies
- Agree the governance for the standard
- Promote approach
 - Internal to your companies
 - With your vendors

Agenda

Global Product Data Interoperability Summit | 2014

- **Why do I need MoSSEC?**

- **What is MoSSEC?**

 **How do I get involved in MoSSEC?**

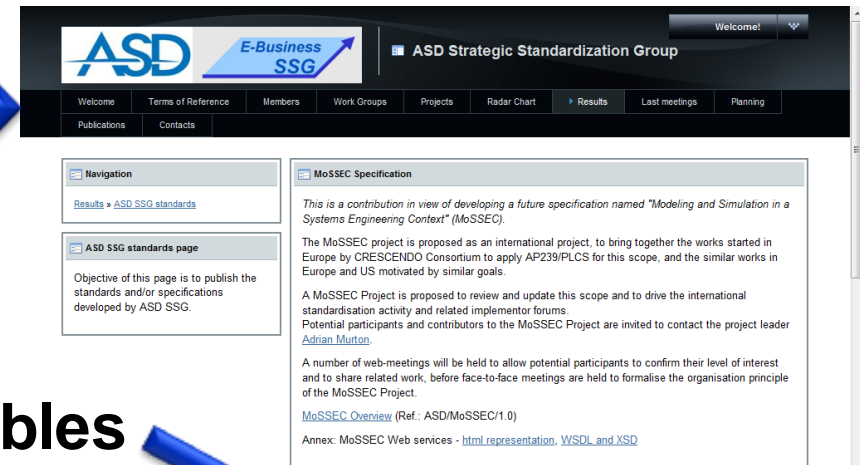

- **Summary**

Involvement: Access MoSSEC information

Global Product Data Interoperability Summit | 2014

- **ASD-SSG website**

- http://www.asd-ssg.org/asd_ssg_standards
- **Overview**
- **WSDL + XSD**

- **CRESCENDO public deliverables**

- <http://www.crescendo-fp7.eu>
- [technical documentation downloads](#)
 - [UML model](#)
 - [Descriptive documentation](#)
 - [Deployment guide](#)

- **Contact:**

- adrian.murton@airbus.com

Involvement: Review the MoSSEC information

Global Product Data Interoperability Summit | 2014

- **Do you agree with the scope of MoSSEC?**
 - What is missing?
- **Do you agree with the Object Model definitions?**
 - How can they be improved?
- **Do you agree with the way information is modelled?**
 - How can it be improved?
- **Does the user documentation make sense?**
 - What topics could be improved?
- **Discuss the approach with your vendors**
 - Do they support it?

Involvement: Attend the Project Kick Off Meeting

Global Product Data Interoperability Summit | 2014

- **Agree initial kick off meeting:**
 - **Date: ???**
- **Agenda:**
 - **Context of the MoSSEC project**
 - **Overall planning of the standard versions**
 - **Overview of the main components**
 - **Organization of bi weekly teleconference**
 - **Preparation of a kick off international MoSSEC workshop**
 - **Consolidation of the draft list of participants**
 - **Duration: 1h30 to 2 hours**

Agenda

Global Product Data Interoperability Summit | 2014

- **Why do I need MoSSEC?**
- **What is MoSSEC?**
- **How do I get involved in MoSSEC?**

 **Summary**

Summary

Global Product Data Interoperability Summit | 2014

- **Why do I need MoSSEC?**

- ***Industrialists:***

- To provides a platform independent approach to structuring and accessing a distributed dataset
 - To enable Modelling and Simulation in a collaborative Systems Engineering Context

- ***Vendors:***

- To provide access to data and processes in other vendor platforms with one set of services

Summary

Global Product Data Interoperability Summit | 2014

- **What is MoSSEC?**

- A SysML based definition of business objects and services extending/specialising ISO 10303-233 (*Systems Engineering*) and -239 (*PLCS*)
- A proposed project launched to further develop the definitions

- **How do I get involved in MoSSEC?**

- Use and contribute to the evolving publicly available definitions and usage guides
- Join the kick off meeting of the proposed MoSSEC project
