ASD SSG meeting N°39

held on the 24 – 25 November 2020, online.

21 participants, from Airbus, LEONARDO, THALES, SAFRAN, AFNeT, ASD Stan, TDI...

Summary

Presentation of the ASD SVC expectation regarding the mapping of the ASD ILS Specs with the EN9300 LOTAR project, as input for the LOTAR 5 years roadmap.

Presentation of the status of progress of the different interoperability working groups (standards development, interoperability forums, etc), with progress in the creation of standards radar charts per working group.

Presentation of the status of development of the OMG SysML V2 submission.

Progress on the standards classification (principles, processes, dictionaries, ontology, information model, formats, services, etc), with the proposal of an interoperability framework.

Presentation of a summary of main standardization activities on digital twins.

Start of discussion on distributed ledger and block chain standards and related processes / digital signature: a conference call is planned in December 2020.

Agreement with the way forward for the next version of the SSG report on "Through Life Cycle".

Agreement to create a new ASD SSG working group gathering status of progress and recommendations for transversal interoperability standards, such as data quality.

Finalization of the Q4 2020 ASD SSG newsletter Q4 2020: planned publication in Dec. 2020.

Presentation of a draft cartography of organizations involved in A&D digital standardization.

Agreement to establish / reinforce coordination with other standardization organizations.

Reports of the AFNeT association, including the overview of the ATLAS project.

Report of ASD Stan, including the status of the DIN Spec Electronic Certificate of Conformity

Preparation of a coordination meeting with the AIA BTIC end of Q1 2021.

Next ASD SSG meeting on the 9 – 10 March 2021 (Online). Two other meetings planned in 2021.
